Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-11, 13-18, and 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Clough (US 5,601,945). Clough discloses a porous resilient organic polymer product comprising resilient non-spherical, elongated, porous organic polymer particles having a mean particle size ranging from 3 to 150 microns (column 13, line 5, and column 16, line 10), a plurality of open cell pores having an average pore size distribution of 0.075 to 10 micron (column 16, line 6) with the pore volume ranging from 40 to 92% (column 15, line 60). Clough discloses particle size of the porous substrate being from 5 to 75 microns (column 13, lines 5-6). Clough discloses the porous substrate further including a surfactant (column 16, lines 62-65). Clough discloses the porous substrate being polypropylene (claim 24). Clough discloses sulfuric acid liquid electrolyte absorbed in the pore structure (column 16, lines 15-20). Clough does not specially disclose the process of making a porous organic polymer set forth in the claims. It is the examiner's position that the article of Clough is identical to the claimed article prepared by the method of the claim, because both articles are

Art Unit: 1771

made of the same organic polymer, having structural similarity (particle size, pore size and pore distribution meeting the specific ranges required by the claims).

Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or an obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process. *In re Thorpe*, 227 USPQ 964, 966 (Fed. Cir. 1985). The burden has been shifted to the applicant to show unobvious differences between the claimed product and the prior art product. *In re Marosi*, 218 USPQ 289,291 (Fed. Cir. 1983). The Clough reference anticipates the claimed subject matter. It is noted that if the applicant intends to rely on Examples in the specification or in a submitted Declaration to show non-obviousness, the applicant should clearly state how the Examples of the present invention are commensurate in scope with the claims and how the Comparative Examples are commensurate in scope with Clough. It is the examiner's position that Clough anticipates the claimed subject matter.

Response to Arguments

4. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.
5. This application repeats a substantial portion of prior Application No. 09/167,320, filed October 10, 1998, and **adds** and claims **additional disclosure** not

presented in the prior application. Since this application names an inventor or inventors named in the prior application, it may constitute a continuation-in-part of the prior application. Should applicant desire to obtain the benefit of the filing date of the prior application, attention is directed to 35 U.S.C. 120 and 37 CFR 1.78. The examiner maintains that this application has been treated as a continuation-in-part and therefore none of the claims are eligible for the benefit of the filing date of the prior application. As a consequence, specification objections have been maintained.

6. Claim objections and the 112 claim rejections have been overcome by the present amendment and response.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will

the statutory period for reply expire later than SIX MONTHS from the date of this final action.
